

2009/2010 List of Donors

My Urban Angel. Thank you.

Every gift to St. Michael's makes a difference. We appreciate them all. Space limitations make it impossible for us to list all of the names of the generous donors who supported us last year. The following lists the names of those who made contributions of more than \$1,000 between April 1, 2009 and March 31, 2010.

BUILDER (\$5 million and up)

Li Ka Shing (Canada) Foundation

FOUNDER (\$1 million and up)

Patrick & Barbara Keenan and Family
Ada Slaughter

GOVERNOR (\$500,000 - \$999,999)

The Harold E. Ballard Foundation
George & Kathy Dembroski
Arthur & Sonia Labatt
Allan Waters' Family

BENEFACTOR (\$250,000 - \$499,999)

Estate of Rodney Stewart Barron
BMO Financial Group
Estate of Murray Clerkson

The Krembil Foundation
Bill Moreneau & Nancy McCain
RBC
Roche Canada
Scotiabank

New technology to treat brain conditions

Thanks to Louis Odette and family, St. Michael's Louis Odette Family Neurointerventional Angiography Suite is treating patients with complex brain conditions like aneurysms, blocked blood vessels that cause stroke, and arterial venous malformations with the latest in technology. New equipment gives specialists the ability to have a three-dimensional view of patients' neurovascular abnormalities and access the brain through a two-millimetre skin incision through a vessel in the region of the hip. This way, patients can avoid having open brain surgery and generally recover faster. Pictured here, Drs. Cian O'Kelly, Julian Spears, Tom Marotta and Walter Montanera.

The Margaret & Wallace McCain Family Foundation Inc.
 Rick & Gayle McGraw
 Molson Coors Canada
 Peter Montour
 Estate of Gordon Mullane
 The Powis Family Foundation

Dr. Neeru Gupta

Dorothy Pitts
1915-2010

Seeing a breakthrough

When **Dorothy Pitts** spoke of St. Michael's, she always remembered the staff and particularly, Dr. Jerry Zownir and Dr. Neeru Gupta. "They have always been so thoughtful and caring." Dorothy was one of the Hospital's biggest champions. She made a significant difference in critical care. Her first major gift in 2000 of \$2 million established the first Chair in Emergency and Acute Care Medicine in Canada. She also helped fund needed equipment throughout the Hospital, including the original "Buddy," a patient simulator in our Simulation Centre.

In 2009, Dorothy made another gift of \$1 million to fund the Dorothy Pitts Term Chair in Ophthalmology and Vision Science, a position held by glaucoma specialist Dr. Neeru Gupta. Dr. Gupta and her team have discovered that glaucoma, a leading cause of blindness that affects at least 67 million people worldwide, spreads to major vision centres of the brain. This discovery has revolutionized our understanding of the disease and stimulated intense investigation into how these nerve cells are affected and why they are dying.

Relief for patients with heart failure

Melissa Rose, RN, sees patients in our Coronary Care Unit with congestive heart failure. "What happens with patients in this condition is that they have too much fluid in their bodies. They are tired, have severe shortness of breath, look puffy, and they can't move freely." Now the team can help them thanks to your support. St. Michael's is the first hospital in Canada to use the Aquadex FlexFlow Fluid Removal System as a treatment option to remove fluid (mainly salt and water) from patients' bodies. "Normally we would have to treat them with high dosages of medication, which can be harsh, has side effects and takes twice as long," says Melissa. "In some cases, we are removing up to 12 litres of fluid and our patients tell us they can breathe and move easier."

Diabetes Discovery

Your support makes it possible for us to fund vital research like Dr. Andrew Advani's. He looks at how high blood pressure can damage the kidneys in diabetes—and specifically, at finding new ways to preserve the health of the tiny blood vessels found in the kidneys, which is key in improving blood flow and limiting damage to the kidneys in people with diabetes.

Right now, Dr. Advani has found a group of drugs, called Histone Deacetylase Inhibitors, which are effective in slowing down the amount of protein that is leaked into the kidneys. He has tested these drugs in models of early and advanced kidney disease, and the drugs have proven to be safe and well-tolerated. That's good news for people with diabetes. Dr. Advani's aim is to slow, and potentially even reverse, kidney damage.

Help for the Homeless

St. Michael's is Toronto's Urban Angel. We reach out to those in need—from youth and adults with serious mental illness, to many who struggle due to poor housing conditions, poverty and homelessness that has a tremendous impact on their health and quality of life.

Donors like you support our Homeless Comfort Fund. The fund provides essential items to people most in need. Winter jackets and boots for people who are homeless and underhoused. Food. Kitchen supplies. A toothbrush. These are just a few examples. Lita King, interim clinical leader manager, Inpatient Mental Health Unit, says there was one man who was given a T-shirt so he had something to wear before leaving the Hospital. "He wouldn't take off the sales tag because having something new was an important event for him." And last winter, we were able to provide a pair of boots to a gentleman who had lost his toes due to exposure and frostbite. He was so happy he wouldn't take them off even though his feet were still sore. This fund helps people who have nowhere else to turn, improves their health and brings a smile to their faces.

Diagnosing Lung Cancer Faster

Donors contributed \$303,000 to bring the innovative Endo-Bronchial Ultrasound (EBUS) to St. Michael's, making the Hospital the first in Toronto to use this technology to help people with respiratory conditions. EBUS gives respirologists like Dr. Victor Hoffstein (shown above) the most efficient and accurate method for diagnosing lung cancer in a way that's minimally invasive.

Big Boost for Therapeutic Endoscopy

The entire Slaight family – Ada Slaight, Allan and Emmanuelle Gattuso Slaight, and Donna and Gary Slaight – has a long history of philanthropy that has made a significant difference for many organizations across Toronto. For the Slaight family, it's important to invest in projects that are going to make a difference over the long term. Both Ada Slaight, and the Slaight Family Foundation made gifts of \$1 million each to St. Michael's in 2009 to support our Therapeutic Endoscopy Unit, the largest in Canada. "Our family is fortunate to be in a position where we can make a difference," says Gary Slaight. "We are pleased to support many areas including healthcare."

Ada Slaight's gift of \$1 million allows us to purchase a fluoroscopy machine, which uses medical imaging technology to show a continuous x-ray image on a monitor, much like an x-ray movie, of a patient's body in motion. This way, physicians can examine the gastrointestinal tract for cancer and other conditions. Through the Slaight Family Foundation, a gift of \$1 million will establish the Slaight Family Term Chair in Advanced Therapeutic Endoscopy. This new position will provide Dr. Paul Kortan with dedicated time to advance new uses for endoscopic techniques.

"The Slaight family's generosity will have a transformative impact on the way we diagnose and treat our patients within our Therapeutic Endoscopy Unit at St. Michael's," says Dr. Paul Kortan. "It is an honour to be the recipient of such a wonderful gift that will make a difference for so many people."

Walking Wonder

Every day, our Mobility team, such as physiotherapist Lesley Jackson, sees patients who need an air cast. These special casts help patients regain their mobility faster following a fracture or broken bone in the foot, ankle or leg. For patients with foot ulcers, it means they can walk without putting pressure on the ulcer. Many of the people we see cannot afford an air cast because they are not covered by OHIP. Your support has helped purchase air casts for patients who could otherwise not afford them.

A better way to blast kidney stones

Kidney stones are painful. So is treating them – but not anymore, St. Michael's has a new lithotripter thanks to Marjorie Waters and family. The new machine provides better access to the patient, so urologists like Dr. John Honey can now remove stones that used to be hard to target. The big plus is that the new lithotripter uses shockwave lithotripsy so it's less painful for the patient. There is no need for incisions so the recovery time for patients is greatly reduced. This is great news for the 3,600 patients we treat each year.

New home for Women's Health

This fall, St. Michael's will open a new Women's Health Centre on the fourth and fifth floors at 61 Queen Street East, thanks to more than \$5.3 million raised by our original Women's Health Committee. This new facility brings together all of our services. One floor is dedicated to obstetrics and includes a high-risk pregnancy unit and breastfeeding clinic. The other floor specializes in gynecology and has the only pelvic health clinic in Toronto with direct access to hospital care.

Meet Harvey, our new teacher

Using patient simulators is essentially important rehearsal time that prepares our students and staff for the real-life dramas that happen in the Hospital every day. Thanks to donor support, St. Michael's has a new star named Harvey. He is a computer-driven cardiopulmonary patient simulator that can realistically simulate nearly any cardiac disease at the touch of a button by varying blood pressure, pulses, heart sounds and murmurs. Harvey can even talk through a built-in speaker, making him an excellent training system that can replicate the interaction between a physician and patient during physical examinations. Pictured here, critical care specialist Dr. Natalie Wong oversees cardiac arrest training.
